

## Carbide Tipped Heavy Duty Holesaws

List No. CT00Y57RXXX -- C3 2-1/4" Cut Deep Holesaw

### Feature

- \* Diamond ground carbide teeth are extremely sharp, powerful and durable
- \* Drop shaped big chip clearance slots for fast uninterrupted drilling
- \* The extra length pilot drills allow the hole saws for cutting uneven surfaces like lap siding
- \* The unique quick release feature ejects saw plugs with ease
- \* Deep self-cleaning gullets 2-1/4" (57 mm) for cutting thick or layered building materials
- \* Higher speed cut and big clearance ensure the hole wall to be cut more smoothly
- \* A quick release arbor design easily attaches or changes out the pilot drill or hole saw

### Application

High-hardness, carbide tipped teeth is ideal for use on material that are too hard and too abrasive for regular hole saws -- wood, wall tile, fiberglass, plastic, ----- even fiber-cement siding

### Sizes Range

Diameter From 5/8" to 13"

Material

C3 Carbide
